

# Cheetah series

## HARD SURFACE ATTACHMENT

1-310-323-1134

www.timbucktoomfg.com

www.tmiusa.net

Cheetah is designed to clean quickly and maintain any hard surface, such as V.C.T. and tile floors with or without grout joints, granite, marble, concrete, cement, irregular surfaces, and a lot more.

Cheetah is designed to drive (driving forward) pressure directly into the soiled surface. Other machines push away from it to move their arm. The reason for driving forward is we install an electric motor to drive the hi-pressure arm & jets forward into the dirt at a constant 1000 RPMS.

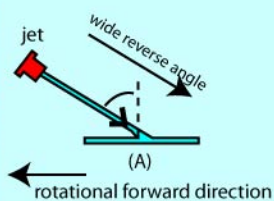

Manufacturer of commercial & environmental cleaning equipment

major difference between other and TMI's is **F.A.S.T.**<sup>TM</sup>

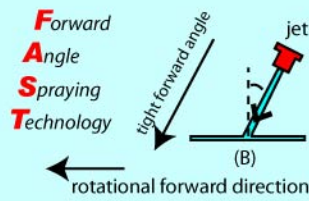

### OTHERS

wide reverse angle move away from the soiled surface

### TMI's **F.A.S.T.**<sup>TM</sup>

tight forward angle spray directly into the soiled surface

**New Technology for Hard Surface Cleaning**

## Specifications: (CH-1000)

- rotationally molded polyethylene & stainless steel body
- 0-3000 psi pump
- over all length 75-1/2"
- base width 13" x 11"
- base height 5-3/4"
- shipping weight 19 Lb. + (varied upon different model)
- stainless steel jets
- stainless steel with ceramic rotation fitting
- handle becomes wand for hi-pressure squeegee tools
- 2 / 1-1/4" wheels at rear
- bristle skirts & squeegee blades 360 degree
- 220 degree F (max) heat range
- limited warranty 3 years on poly body, 1 year parts & 90 days labor
